February 6th, 1918

Rev. Bruce Taylor,

Montreal.

My dear Taylor:

We are very glad to know that you are coming to Toronto next Tuesday when I hope to be able to see you apart from the putlic reception. We would have written down to invite Mrs. Taylor and yourself to stay with us were it not that we have illness in the family and every room is occupied. It so happens also that by previous arrangements which could not be changed my wife will have to be giving most of her attention at that time to the annual meetings of the Christian Associations of the Dominion which are held next Tuesday. That, however, will not prevent us from seeing you.

I am very sorry that owing to the order of the Fuel Controller we find it necessary to shut down the Convocation Hall for the rest of the term and to cancel the sermons. This will mean that we are not to be able to have you for the third of March. I know that a very great number as well as myself regret this exceedingly.

With kind regards, I am,

Yours sincerely,

President.

President of University of Toronto.
Toronto, Canada.

Dear Sir.

At present I am manager of this plant, but wish to make a change and will consider a position in some industrial educational work. If you know of any opening I shall appreciate it if you will inform me about it.

I am a graduate Mechanical Engineer with the degree of B.S. & M.E. I was for fourteen years Superintendent of the shops in a large Engineering School and have had considerable experience in industrial educational work.

I also have had fourteen years experience in manufacturing plants over a wide field of work, with varied materials

Yours truly.

C. G. Taylor 83 Buckingham St.
